

# The Greener Cleaner ®

Trade Mark : 1058291 (The Greener Cleaner)  
and  
Trade Mark : 762040 (The Greener)

## Instructions for use

**100% Biodegradable**

**Live Smarter - Work Less - Save Money**

**No Toxic - Non Flammable - Non Abrasive - Non Pollutant**

**The Greener Cleaner ®** formula is designed so that you the user can get extraordinary value for money by adding extra water for certain job applications.

Below is a guide which you can use as a starting point and you can experiment with dilution ratios to get your desired results for any type of cleaning you do.

From the supplied base product the following is a guide line for you to create your own in-house **The Greener Cleaner ®** brew for the types of cleaning for you or your business.

**General purpose spray.** For all surfaces, walls, stove tops, including carpet stains and much more.

**Mix** 1 part of **The Greener Cleaner ®** with 2 parts of water in a spray bottle for the above applications. If this ratio works then try adding say 3 / 4 / 5 parts of water or even more. Test each dilution ratio as you go and adjust accordingly.

**Windows / Glass.**

**Mix** 1 part of **The Greener Cleaner ®** with 15 parts of water in a spray bottle for windows or glass. If this ratio works then try adding say 20 / 25 / 30 parts of water or even more. Test each dilution ratio as you go and adjust accordingly. Spray on and then wipe off with a clean dry rag or microfiber cloth.

## Mopping floors.

**Option 1.** In a bucket first put 20 - 60 ml of **The Greener Cleaner ®**. Next add hot water. This will create suds in the bucket. Mop on floors.

**Option 2.** In a bucket first add hot water. Next add 20 - 60 ml of **The Greener Cleaner ®**. Stir the bucket until **The Greener Cleaner ®** is mixed into the water. This option should produce no suds. Mop on floors.

## Washing up dishes

**Option 1.** Run hot water first. Then add 20 - 40 ml of **The Greener Cleaner ®** into the hot water. Wash dishes.

**Option 2 (preferred option).** In a 500 ml soap dispenser pump, first put 300 - 400 ml of water. Then add 100 - 200 ml of **The Greener Cleaner ®** into the dispenser.

- Do not put the plug in the sink.
- Next, rinse off all the plates you want to wash with cold water.
- Next use a wet yellow sponge with a green nylon-backed scourer and pump the diluted solution of **The Greener Cleaner ®** from the 500 ml pump into the yellow sponge. Squeeze the sponge until it becomes sudsy.
- Next clean each item individually with the yellowy sudsy sponge and leave these items in the sink.
- Next when the sink is half full of items with the suds on them, run cold water over each item and then place them in the drying rack.
- Benefits: You will not have to use hot water which will save you quite a bit of money. The dispenser you created will last a long time for washing your dishes in cold water by hand. Everything will be wonderfully cleaner via **The Greener Cleaner ®** way with the basic dishwashing process.

## Laundry

For any stains first wet the stain or collar. Spray the area with a general purpose spray or use full strength **The Greener Cleaner ®** and then scrub with a nylon brush until clean with suds. Throw the scrubbed garments into the washing machine with the rest of the cloths which did not need scrubbing.

## Top loading washing machines.

Put all clothes into the top loader. Add the required amount of **The**

**Greener Cleaner**® evenly over your clothes. Lastly set the top loader to the lowest practical water level then run the machine. Note for best results use low water levels and more of **The Greener Cleaner**® for the first time to test the waters as they say. Reduce **The Greener Cleaner**® levels as you experiment to attain the best results with the amount of **The Greener Cleaner**®.

Light loads	30 - 50 ml	Medium loads	50 - 100 ml
Heavy loads	100 - 150 ml	(increase quantity to produce softer garments)	

### **Front loading washing machines.**

Pour the required amount of **The Greener Cleaner**® evenly onto one garment, then place that garment into your machine with the other clothes.

Light loads	20 - 40 ml	Medium loads	30 - 70 ml
Heavy loads	70 - 120 ml	(increase quantity to produce softer garments)	

### **Shower Cleaner**

Pour 750 ml hot water in a bowl. Add 50 - 100 ml **The Greener Cleaner**® into the water. Because of the hot water wear gloves. Place a yellow sponge with a green nylon-backed scourer into the bowl. Squeeze the sponge several times in the solution. Then scrub glass / tiles / grout with the hot sudsy scourer. Do sections of the shower and then rinse each section with water.

### **Windows Outdoor and Car Shampoo**

In a bucket big enough for a soft broom first add 30 - 50 ml **The Greener Cleaner**®. Then fill up the bucket with hot or cold water. Dip the broom into the bucket then proceed to clean the windows / car with the broom. Do separate sections of the window / car with the broom and then hose off (check windows are closed and do not leak before cleaning).

### **Carpet Stains** - Use General Purpose Spray bottle

Spray stain until saturated with solution. With a soft nylon brush scrub the stain for a short time. This will produce suds. Use a white soft cloth the then wipe off the suds. Presto.....the stain has greatly improved or gone. Do not use a colored cloth as the dye color may go into the carpet.

### **Walls** - Use General Purpose Spray bottle

Spray on walls and rub with a soft sponge or cloth and then wipe off with

the same cloth or another dry one.

### **Toilets** - Use General Purpose Spray bottle

Spray the toilet bowl then scrub with toilet brush then flush. Next spray the toilet seat and water tank then wipe dry with a clean cloth. Wear gloves.

### **Wooden Furniture** - Use General Purpose or Window Spray bottle

Spray furniture and wipe off with a clean cloth.

### **Floors**

**Option 1.** In a bucket first add 20 - 50 ml **The Greener Cleaner** ®. Then add hot or cold water. Next mop floors. This will produce some suds in the bucket.

**Option 2.** Fill up a bucket first with hot or cold water. Then add 20 - 50 ml of **The Greener Cleaner** ®. Stir the bucket gently first to dissolve cleaner in the water. Next mop floors. This should produce no suds in the bucket.

### **Dishwashers**

Use your normal powder in the dishwashing compartment. In the rinse aid section fill up with **The Greener Cleaner** ®.

### **Benches** - Use General Purpose or Window Spray bottle

Spray benches and wipe off with a clean cloth.

### **Pet Wash**

**Option 1.** Wet your pet first. Next saturate the coat of your pet with the General Purpose spray. Rub in and leave for a few minutes. Next rinse off and then dry your pet.

**Option 2.** Wet your pet first. Then pour on the spine a generous amount of undiluted **The Greener Cleaner** ®. Rub in until foamy and leave for a few minutes. Next rinse off and then dry your pet.

### **Fruit and Vegetables** - Use General Purpose or Window Spray bottle

Spray on fruit and vegetables. Rub them with a wet yellow sponge. Wash off with clean water.

**The Greener Cleaner** ® is a superior all-purpose cleaner that is effective

for all domestic and commercial cleaning applications. By following the instructions, your living costs / business expenses should be significantly reduced.

**The Greener Cleaner®** products are manufactured using totally environmentally-safe ingredients with essential oils. Our fragile environment, which has been under attack over many generations, can now benefit greatly with **The Greener Cleaner®**.
